Professional Summary

Senior Full Stack Engineer with 8+ years of experience building scalable web platforms and high-performance backend systems using Node.js, PHP, Python and modern JavaScript frameworks. Experienced in designing RESTful APIs, microservices architectures, and distributed systems supporting high-traffic applications across sports analytics, e-commerce, and event management platforms. Proven track record of improving system performance, scaling applications to 10k+ concurrent users, and delivering reliable production systems with 99.9% uptime. Skilled in performance optimization, caching strategies, and cloud deployments using AWS and Docker.

Core Technical Skills

- **Programming Languages:** Python, PHP, JavaScript (ES6+), TypeScript, SQL.
 - **Backend Development:** Django, Laravel, Node.js, Express.js, NestJS, RESTful APIs, MySQL, PostgreSQL, MongoDB, Redis.
 - **Frontend Development:** React, Vue.js, Bootstrap, Tailwind CSS, Sass, Less, Responsive UI/UX Design.
 - **AI/ML Ecosystem:** NumPy, Pandas, Scikit-learn, TensorFlow, Basic ML model deployment.
 - **Databases & Caching:** MySQL, PostgreSQL, MongoDB, Redis.
 - **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, Jenkins, CI/CD Pipelines.
 - **Testing & Tools:** PHPUnit, Jasmine.js, Firebase, WebRTC, Git (GitHub, GitLab, Bitbucket).
 - **Engineering Practices:** System Design, Performance Optimization, Distributed Systems, Agile Development.
-

Work Experience

Senior Full Stack Engineer

RotoBaller | New York

Dec 2021 – Present

- Designed and developed a scalable NFL ranking platform used by thousands of fantasy sports users, increasing user engagement by 60%.
- Reduced API response latency by 40% by optimizing SQL queries, implementing Redis caching, and refactoring backend ranking services.
- Built scalable REST APIs supporting real-time ranking updates and sports data integrations.
- Implemented backend performance profiling and indexing strategies to improve reliability and reduce server load.
- Delivered a high-availability application contributing to a 50% increase in platform usage.

Senior Full Stack Engineer

Menuhat | Riyadh

Jan 2023 – Dec 2024

- Designed backend services for a food ordering platform supporting 10k+ concurrent users.
- Reduced page load times by 70% through optimized queries, caching strategies, and AWS infrastructure improvements.
- Built microservice components using Node.js and Docker to improve system scalability.
- Developed analytics dashboards reducing support queries by 30%.
- Increased conversion rates by 15% through responsive UI improvements and backend performance optimization.

Senior Full Stack Engineer

Klik | North Carolina

Feb 2022 – Jan 2023

- Developed a scalable event management platform enabling ticket browsing and booking.
- Improved ticket booking performance by 25% through API and database optimization.
- Implemented real-time notifications to improve engagement.
- Integrated secure payment gateways increasing successful transactions by 20%.

Senior Full Stack Engineer

The Cube | Athens

Oct 2021 – Feb 2022

- Designed and delivered the Recruitscape recruitment platform.
- Reduced manual HR operations by 35% through hiring workflow automation.
- Implemented video interview capabilities using WebRTC and Firebase.
- Built scalable architecture supporting high-volume recruitment with 99.9% uptime.

Mid-Senior Full Stack Engineer

For All | Riyadh

Jan 2021 – Oct 2021

- Architected backend infrastructure for a multi-service super app.
- Improved API response times by 30% via caching and query optimization.
- Integrated secure payment systems increasing transaction success by 50%.
- Implemented monitoring and error handling maintaining 99.8% uptime.

Full Stack Engineer

Malexs | Alexandria

Aug 2017 – Jan 2021

- Developed web and mobile applications for healthcare, e-commerce, and service industries.
 - Built RESTful APIs supporting multiple web and mobile platforms.
 - Created cross-platform apps using Ionic and Flutter.
 - Delivered production systems including Medical One Clinic, HNAcare, Fosol, Boxaqra, Mahal, Zerofat, Rahtk, and Menuhat.
-

Key Projects

RotoBaller NFL & MLB Ranking Platform

- Built a scalable ranking engine used by thousands of fantasy sports users.
- Optimized ranking calculations and database queries improving API response times by 40%.
- Implemented caching strategies using Redis and optimized indexing.

Menuhat Food Ordering Platform

- Designed backend architecture supporting 10k+ concurrent users.
 - Reduced page load time by 70% through caching and database optimization.
 - Built analytics dashboards for business metrics tracking.
-

Education

- **Master of Information Technology** (AI & Systems Focus) Alexandria University | *Sep 2022 – Present*
 - **Bachelor of Engineering** Alexandria University | *Sep 2014 – Aug 2018*
-
